

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	16 Feb 2026
Team ID	LTVIP2026TMIDS82308
Project Name	DocSpot: Seamless Appointment Booking for Health
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

1

Define your problem statement

PROBLEM
How might we make doctor appointment booking faster and more convenient for patients by providing real-time availability and an easy online scheduling system?

PROBLEM
How might we help doctors manage appointments efficiently through a centralized platform that organizes schedules and patient requests?

PROBLEM
How might we ensure a secure and trustworthy healthcare platform by implementing role-based access and doctor approval workflows?

PROBLEM
How might we allow patients to easily manage, reschedule, or cancel their appointments without needing manual assistance from hospital staff?

PROBLEM
How might we keep patients and doctors informed about appointment updates through a clear and reliable notification system?

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

Narendra Mongam

Real-time doctor availability calendar.

One-click Book/Now appointment form.

Doctor dashboard with daily schedule view.

Secure file upload using Mulet.

Accept/Reject appointment requests.

Automatic time slot management.

Upload medical reports during booking.

Status tracking system.

Role-based login (Admin/Doctor/User).

Notification alerts for pending approvals.

JIT authentication middleware.

Booking history dashboard.

Update appointment status (Pending → Scheduled → Completed).

View patient documents before consultation.

Appointment reminder notifications.

Monitoring dashboard for platform activity.

Easy reschedule and cancel option.

Admin approval system for doctor registration.

REST API integration using Axios.

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

🕒 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Patient Experience Ideas

Real time doctor availability calendar.
One click **Book Now** appointment form.
Upload medical reports during booking.
Appointment reminder notifications.
Booking history dashboard.
Easy reschedule and cancel option.

Doctor Experience Ideas

Doctor dashboard with daily schedule view.
Accept/Reject appointment requests.
Automatic time slot management.
View patient documents before consultation.
Update appointment status (pending → Scheduled → Completed).

Admin & Governance Ideas

Admin approval system for doctor registration.
Role-based login (Admin/Doctor/User).
Notification alerts for pending approvals.
Monitoring dashboard for platform activity.

Technical Feature Ideas

JWT authentication middleware.
Secure file upload using Multer.
Status tracking system.
REST API integration using Axios.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H** key on the keyboard.
