

Project Design Phase

Problem – Solution Fit

Date	15 February 2026
Team ID	LTVIP2026TMIDS82308
Project Name	DocSpot: Seamless Appointment Booking for Health
Maximum Marks	2 Marks

Problem – Solution Fit:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) • Patients needing fast online appointments • Doctors requiring schedule management • Hospital/Admin staff verifying doctors • Working professionals & students	6. CUSTOMER CONSTRAINTS • Limited time to visit hospitals • No real-time appointment visibility • Trust issues with unknown doctors • Internet dependency for booking • Need for secure document handling	5. AVAILABLE SOLUTIONS • Traditional phone bookings • Walk-in clinic visits • WhatsApp/manual scheduling • Complex health apps • Paper-based records	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS • Book appointments quickly • Track doctor schedules • Verify doctor credentials • Centralize medical records	9. PROBLEM ROOT CAUSE • Manual scheduling delays • No centralized platform • Lack of automation • Poor communication	7. BEHAVIOUR • Search doctors online • Use digital booking forms • Doctors check dashboards • Admin verifies doctors	Focus on AC, Address
How BE, understand RC	3. TRIGGERS • Urgent medical needs • Busy lifestyle • Friend's recommendation • Health reminders	10. YOUR SOLUTION DocSpot: A MERN-stack platform for online doctor bookings with real-time availability. • Role-based dashboards (Admin, Doctor, User) • JWT Authentication & Document Upload • Appointment Tracking via MongoDB Atlas	8. CHANNELS of BEHAVIOUR • ONLINE • Web platform • Email notifications • Digital booking • OFFLINE • Hospital visits • In-person consultations	
	4. EMOTIONS: BEFORE / AFTER • Before: • Frustrated • Confused • Anxious • After Using DocSpot: • Relieved • Confident • Comfortable
